

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

Human Body Donation Coordination Office of Beijing Red Cross
September 21, 2018

The “National Organ Management Center” is under the jurisdiction of China’s Red Cross, not the National Health and Family Planning Commission.

The responsibilities of Red Cross are to register the organ donations and do some publicity work.

Summary

1. This is Beijing Red Cross. However, human body (donation) and organ (donation) are handled by two different departments.
2. Do not contact those unofficial channels. They are quite a mess. Contact us, we are your official channel. There is no problem with us!
3. There have been several hundred human body donations, from all over Beijing, involving three medical universities. We started human body donation registration system in year two thousand something.
4. Wang Zhaohui is in charge of organ donation. It is Wang who takes charge of that.
5. Question: He said that Beijing Red Cross does not engage in organ donations?
Answer: His explanation should be the most accurate source of reference, as he is in charge of that sector.

Telephone Investigation Recording

Operator: Hello!

Investigator: Hello! How do you do? Are you the Office of Human Body and Organ Donation at Beijing Red Cross?

Operator: Oh, this is the Office of Human Body Donation, not Organ donation.

Investigator: Are you Red Cross, or somewhere else? Because when I called Xicheng District...

Operator: What do you need? First of all, tell me what you need.

Investigator: Oh, a friend of mine, one of his family members wants to donate organs. I then called Xicheng District, they gave me your number and asked me to call you. So are you Beijing Red Cross, or...

Operator: Right, this is Beijing Red Cross. However, human body(donation) and organ (donation) are handled by two different departments. I will give you the phone number of organ donation office, Okay?

Investigator: Great. Thank you so much!

Operator: Well, please write it down.

Investigator: Great. Thanks. Go ahead.

Operator: 6394

Investigator: 6394

Operator: 7234

Investigator: 7234. 63947234, correct?

Operator: Umm, correct, correct. Try that number.

Investigator: Ah?

Operator: Hello, Umm, try that number. If no one picks up the phone, call again after the holiday. It's a holiday today!

Investigator: Oh, I have another question for you. That is, this number you just gave me, is the number of Beijing Red Cross'...

Operator: Organ Management Office of Red Cross.

Investigator: Organ Management Office of Red Cross, correct?

Operator: Yes, yes.

Investigator: Beijing, municipal level?

Operator: Yes, yes.

Investigator: Oh, it seems that Beijing, it seems that there is another one at country level. What is the relationship between the two?

Operator: Uh, the country level Red Cross takes charge of the entire country. Beijing Red Cross takes charge of Beijing only.

Investigator: Oh...

Operator: They belong to the same system.

Investigator: Oh, the person at Dongcheng district, also told me that, you may call the number of country level (Red Cross). I said country level takes charge of the entire country, and I asked him if there is organ donation system in Beijing.

Operator: Yes, there is.

Investigator: So there is such a system. It is this number you gave me, right?

Operator: Correct.

Investigator: So now as for organ donation, are we doing it in Beijing?

Operator: We are! There have been quite a number of donations now. All have been successful.

Investigator: You mean, quite a number of human body donations?

Operator: Right. After the person passes away, the entire body is donated for anatomy in medical colleges. While organ transplants are for patients who are alive, so that the patient can continue to live, right? They are different.

Investigator: Oh, you are Beijing Red Cross organ donation office, right?

Operator: We are at one workplace, upstairs and downstairs, but I am not in charge of that, and I cannot explain to you. Umm.

Investigator: Oh, you are both under Red Cross, right?

Operator: Correct!

Investigator: Oh, then I know. All right. I will call that number!

Operator: You can rest assured. We are both official channels!

Investigator: Haha, because, this friend of mine, is very meticulous and detailed. He wanted me to ask these questions, and find out more details...

Operator: Umm.

Investigator: However, I asked around and spent a lot of time, but I could not find answers. Those I asked...

Operator: Do not contact those unofficial channels. They are quite a mess. Contact us, we are your official channel. There is no problem with us!

Investigator: So human body donation, here you have a lot of them, right?

Operator: Uh, yes, a lot. As of now, roughly several hundred a year!

Investigator: You said that these three hospitals are involved, and the number is several hundred. Or is it just one hospital?

Operator: It's Beijing, all over Beijing.

Investigator: Oh, several hundred. Are there a lot of donations this year?

Operator: Really a lot. Every year there are a lot and it's increasing year over year. I think, we have been doing it for ten years, twenty years.

Investigator: You have been established for so long, ten years, twenty years?

Operator: Right. I am new here; I am not in charge of this part. It should have been a long time, because the registration system was put to use in year two thousand something.

Investigator: Oh, that is to say, these three hospitals, are their donations the same thing as the donations you received? Or, are you overseeing these three hospitals?

Operator: We are overseeing these three hospitals.

Investigator: So however, many they donated, they will report to you?

Operator: Oh, yes, we are the upper level management.

Investigator: Oh, then I see. Because when I called a hospital the other day, they talked about human body donation. I explained that we do not plan to do human body donation, just organ donation.

Operator: Right! You first try to be clear about what human body donation is and what organ donation is, then you contact the relevant division, Okay?

Investigator: Right. That person did not explain it clearly, they told me to contact some place, but it was not the right place either. Later my friend called the municipal level Red Cross, the person's name is Wang Zhaohui. Is he the person in charge?

Operator: Correct. He is.

Investigator: He is the one in charge?

Operator: Right.

Investigator: He told me that, they are not involved in human body donation. He said that Red Cross, Beijing Red Cross, is not involved in Organ donation.

Operator: They are in charge of organ donation. It is Wang who takes charge of that.

Investigator: Do they really do it? He said he had not started, He said they are in preparation stage, and has not formally started yet. Is it so?

Operator: Oh, his explanation should be the most accurate source of reference, as he is in charge of that sector.

Investigator: Oh, then, you are not the same as country level Red Cross?

Operator: Um, not the same, country level is called China Red Cross.

Investigator: Oh, you just said there is a national... national organ management center, is it under the jurisdiction of country level Red Cross? Or is it under...

The "National Organ Management Center" is under the jurisdiction of China's Red Cross, not the National Health and Family Planning Commission.

Operator: Correct, under China Red Cross.

Investigator: Not under National Health and Family Planning Commission?

Operator: No.

Investigator: The one under Red Cross is...

Operator: Ah, the responsibilities of Red Cross are to register the organ donations and do some publicity work.

Investigator: OK. Thank you. I will call that number now.

Operator: Right, call a couple of places to ask around, and find out a clear answer. You go look for the person in charge directly. Their explanation is the most accurate.

Investigator: That's right. Someone says it this way, another one says it another way, I was so confused. All right, thank you then.

Operator: Exactly!

Investigator: Great. Bye!

Operator: Okay, Bye-bye.
