

追查迫害法輪功國際組織 (追查國際)

World Organization to Investigate the Persecution of Falun Gong (WOIPFG)

To investigate the criminal conduct of all institutions, organizations, and individuals involved in the persecution of Falun Gong; to bring such investigation, no matter how long it takes, no matter how far and deep we have to search, to full closure; to exercise fundamental principles of humanity; and to restore and uphold justice in society

A Nurse from the Kidney Transplant Department's Ward at the Third People's Hospital of Datong

Date: September 11, 2017 (Phone number: +863525556292)

Summary

1. "The hospitals in Taiyuan do a lot of transplants, they do more than a dozen transplants in one day!"
2. The hospital performed two organ transplants last year. "The patients were government officials. They found kidney sources by themselves." They found donors from Taiyuan and some other places.

Phone Investigation Recording

Investigator: Hello, is that the urology department of the Third People's Hospital of Datong?

Nurse: Yes.

Investigator: Ah, I would like to ask you: my relative wants to have a kidney transplant. Do you still do this?

Nurse: Well, we do kidney transplants, but please contact our director for specific details.

Investigator: Uh, what is the name of your director?

Nurse: You may call the artificial kidney dialysis department to find out.

Investigator: Oh, I don't have their number. I only found your phone number.

Nurse: It is not easy to find kidney sources nowadays. Without kidney sources, we only do one transplant a year, sometimes.

Investigator: Ah, one transplant a year? So you...

Nurse: There is no kidney source now! Kidney sources (inaudible)... Two transplants a year, at most two transplants per year is the best situation (we could get). The hospitals in Taiyuan do a lot of transplants, they do more than a dozen transplants in one day!

Investigator: Really? Did you say that last year your hospital also did two or three operations?

Nurse: Two, as I remember.

Investigator: Two operations. So there's no wait time, right, in this situation?

Nurse: Correct. The patients were government officials. They found kidney sources by themselves.

Investigator: Oh, so like this. They can also find donors themselves, oh, but I don't have such resources to find organs. I still need...

Nurse: That's why I just said that if you don't have a kidney source, it is very difficult for you to wait for kidney sources in Datong.

Investigator: Oh, so if some patients want to have kidney transplants, they need go find a donor like those government officials, then you can perform the transplant operations for them, right?

Nurse: No, they contacted (and obtained the kidney sources) by themselves. There are several places in Taiyuan that can help transfer donors over. The patients would go to the places with kidney sources to do tissue typing. It happened that their tissue typing took place here.

Investigator: Oh, so the donors were in Datong, when the hospitals in Taiyuan finished tissue typing, the patient would come here and have the transplant in your hospital?

Nurse: No. I don't know where they found donors. Anyway, the donors were transferred here from other places!

Investigator: Oh, it's like this. I am not as capable. All right, I just wanted to learn some basic information. If we cannot do it here, I will see if we can do it in Taiyuan. All right?

Nurse: All right.

Investigator: OK, Thank you! Bye!
